

*Join Solid Gear to start your  
professional path in software development*

**WHAT WE OFFER:**

Solid GEAR is a one-year-old start up, trying to make a difference in the development of mobile applications over smartphones and tablets.

We offer a fun workplace near the university of Valladolid in an international environment (main partners based in Boston).

Working with us you will learn how trending technologies are used and handled to provide amazing new software to enterprises. All our processes follow agile methodologies, which will allow you to learn how to be a real team-player.

One of Solid GEAR's principles is that every member of the team (either you are a developer, designer, tester...) are comfortable everyday and find time in the daily routine to develop their personal skills and learn something new each day.

**POSITION DETAILS:**

- 6-months internship
- 20, 25 or 30 hours per week (to be agreed and accommodated according to the student's preferences, from Monday to Friday, from 8h to 15h)
- Envisioned tasks:
  - Taking part in the software development cycle as any other member of the team.
  - Developing mobile applications for iOS devices.
  - Collaborating in the development of other elements of the global solution (Android apps, backend...)

**WHAT WE LOOK FOR:**

Due to our international projects, we are looking for high proficiency in both written and spoken English.

Being an ICT company, we need some technical stuff to be covered, so we are looking for Computer Science or related engineering students.

Though no previous professional experience is required, we look for a candidate with some **knowledge in Objective-C** and mobile app development.

So, if you are capable of working in English, and you love mobile technologies, this is your opportunity!

**WHAT WE ARE ALSO INTERESTED IN:**

Though these are not strong requirements, knowledge in the following fields is also valuable:

- PHP, Python
- Javascript, JQuery, HTML5
- Web services, ReST interfaces and JSON format
- Java, Android SDK

**HOW TO CONTACT US:**

Send your CV and a short motivation letter to the following email address:

Human resources: [rrhh@solidgear.es](mailto:rrhh@solidgear.es)

Or contact us by phone at **+34 644 164 919** or **+34 983 11 42 14**
