

Senior Web Designer

Location: Central Dublin

A young and well founded startup company providing technology, marketing and distribution solutions to both education and leisure travel sectors is hiring a Senior Web Designer with outstanding skills in UI and UX to join their team. This is a fantastic opportunity to work with a group of talented individuals with an exceptional track record of delivering web applications and large scale/high traffic architectures.

In this role, the Web Designer will work with the Product Managers, Engineers, Creative Designers and Customers to create an intuitive and cohesive look, feel and overall user experience for the main website of the company.

Key Requirements:

- 3+ years experience designing interfaces, user experiences and interaction design for rich interactive web applications for the consumer and enterprise
- Ability to produce detailed user flows/wireframes for desired functionalities
- Strong visual design skills, including an eye for good typography, composition, and use of colour
- Knowledge of Adobe Creative Suite & ability to work with external creative agency/designer when needed
- Strong information architecture skills
- Self starter & self motivated – keeps up with the latest trends & technologies
- Ability to be pragmatic and implement the right solution according to the business requirements / deliver within agreed timescales
- Excellent attention to detail
- Ability to learn a business domain and make informed design decisions based on the specific usage patterns of the application
- A methodical, clear approach to work
- A keen interest in everything digital
- Ability to implement your work in HTML5/CSS3
- Show an online portfolio of recent Web UI and UX work

The Ideal Candidate:

- Is a talented Web designer who knows digital inside and out.
- Has ideas spilling out of his head for design simplifications, improvements and additions to user experience.
- Produces design work that is modern, clean, focused, and inspiring.
- Is passionate about the travel industry
- Has worked with teams of developers and understands the web product development cycle
- Can use git/github or other revision control systems
- Is a nice person, easy to work with
- Is business minded, and can work and earn respect of both the technical and product/business team
